## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 to 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morton et al. in view of Biro.

Morton et al. discloses fabrication of slip-resistant surfaces on components by punching to form indentations and corresponding protrusions on opposed surfaces, as required by these claims.

Biro discloses a slip-resistant aquatic component, and advises that a slip-resistant texture formed by protrusions is especially desirable for surfaces expected to be slippery due to the presence of water. See column 2, lines 5 to 16 and column 3, lines 13 to 21.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to form components having slip-resistant protrusions by the Morton et al. process for use in aquatic environs following the teaching of Biro that surfaces with protrusions are desirable in such surroundings. The particular use of the components, as recited in Claims 6 to 8, and the

selection of a corresponding suitable material are considered to be obvious exercises of mechanical skill, and not patentable distinctions absent a disclosure of criticality in the solution of stated problems in the combination of any specific component use and material. It is noted that the hexagonal orientation of the protrusions shown by Morton et al. forms a "decorative pattern" as recited in Claim 4.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Felsenthal, Gruber and Moseley further show the state of the art.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the undersigned Examiner whose telephone number is (703) 308-1873 and fax number is (703) 305-9835 (draft papers) or (703) 305-3579 (formal papers).
